## Fairway Improvement Project

\*Starting Monday, August 26th\*

We are excited to announce a significant golf course improvement project that will be starting very soon. We will be switching from Poa Annua/Kentucky Bluegrass mix to Creeping Bentgrass in our low-lying, shaded fairways (Hole #'s 1, 4, 5, 11, 12, 14 & 15). The Poa Annua in these fairways is simply incapable of surviving extreme heat and moisture. Creeping Bentgrass will perform much better on the fairways during the difficult summer months and provide you with better playing conditions.

### What you need to know:

- All the holes will remain open throughout the fairway conversion project.
  - It will NOT be Cart Path Only!  
Carts MUST stay in the rough throughout the holes being worked on. You can drive near and around the greens
  - Please do NOT hit a shot from the fairways.  
The rough will be mowed down around the fairways.  
Please hit your ball from the rough!

*Thank you for your understanding and cooperation during this long term improvement project!*

*This is a temporary inconvenience for long term improvements!*
